Advance bulletin 1971 CENSUS OF CANADA

Bulletin préliminaire RECENSEMENT DU CANADA 1971

POPULATION BY BIRTHPLACE

POPULATION SELON LE LIEU DE NAISSANCE

This report presents final population counts of the 1971 Census, showing a distribution by birthplace. Figures are shown for Canada, provinces, census divisions, incorporated cities, towns and villages of 10,000 and over, as well as for census metropolitan areas.

More detailed classifications of birthplace by country of birth, etc., will be issued at later dates as part of the regular volume series of final reports of the 1971 Census. This advance report is released to make available totals for the numerically large birthplaces at an earlier date.

Country of birth refers to birthplace as determined by political boundaries in existence at the time of the census. Persons born in Newfoundland or Labrador before it became a province of Canada are reported as born in Canada.

"The information in this report was collected on a sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100 p.c. basis. The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707)."

The 1971 figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. This technique will be described in the reports of the 1971 Census volume series.

Each bulletin of the 1971 Census volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that bulletin. The user interested in obtaining an indication of the reliability of these advance data should refer to the appropriate bulletin in the volume series.

Ce bulletin présente les chiffres définitifs de population, au recensement de 1971, du Canada, des provinces, des divisions de recensement, des cités, villes et villages constitués de 10,000 habitants et plus et des régions métropolitaines de recensement, selon le lieu de naissance.

Des classements détaillés selon le pays de naissance, etc., paraîtront ultérieurement dans le cadre de la série des volumes du recensement de 1971. L'objet de ce bulletin préliminaire est de communiquer le plus tôt possible les chiffres relatifs aux lieux de naissance les plus fréquents.

Le lieu de naissance s'entend du pays de naissance selon ses frontières politiques le jour du recensement. Les personnes nées à Terre-Neuve ou au Labrador avant que ces territoires ne deviennent une province du Canada sont considérées comme nées au Canada.

"Les renseignements de la présente publication ont été recueillis par échantillonnage. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 p. 100. Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir publications nos 92-704 à 92-707 au catalogue)."

La confidentialité des données de 1971 présentées ici est assurée par la méthode utilisée au recensement de 1971 pour interdire la possibilité d'associer des chiffres de faible importance à une personne en particulier. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.

Chaque bulletin de la série des volumes du recensement de 1971 renfermera des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne relativement aux groupes de caractéristiques observées. L'utilisateur désireux de connaître le degré de fiabilité de ces données préliminaires devra consulter le bulletin approprié de la série des volumes.
